

SETUP WIZARD – NETWORK SETTINGS

1. The final steps during the initial log-on and setup are to configure the Network Settings and change your computer network settings back to original status. **NOTE: You may need the assistance of the IT Administrator.**
2. Click "Edit."

The screenshot shows the 'Wizard' interface with the following settings:

- Language
- License
- Card Format
- Holiday Group
- Schedule
- Door
- Access Level
- Card Holder
- Card
- Network**
- Start Save

The 'Network' configuration window displays the following details:

Basic	
IP Type *	: Static
IP Address *	: 192.168.0.120
Subnet Mask *	: 255.255.255.0
Gateway *	: 192.168.0.1
DNS Server 1	:
DNS Server 2	:
HTTP Port	: 80

The 'Edit' button is highlighted with a red box, and a red arrow points from the text 'Click "Edit."' to it.

SETUP WIZARD – NETWORK SETTINGS

1. The final steps during the initial log-on and setup are to configure the Network Settings and change your computer network settings back to original status. **NOTE: You may need the assistance of the IT Administrator.**
2. Click "Edit."
3. Select the "IP Type." If you selected "DHCP," click "Save and Reboot."

The screenshot shows the 'Wizard' interface with the following settings:

- Language
- License
- Card Format
- Holiday Group
- Schedule
- Door
- Access Level
- Card Holder
- Card
- Network**
- Start Save

The 'Network' configuration window shows the following details:

- Configuration > Network Setting > IP Address
- Basic
- IP Type * : DHCP Static
- IP Address * : 192.168.0.120
- Subnet Mask * : 255.255.255.0
- Gateway * : 192.168.0.1
- DNS Server 1 : (Optional)
- DNS Server 2 : (Optional)
- HTTP Port : 80 (Default 80)
- Buttons: Save & Reboot (highlighted), Reset, Cancel

SETUP WIZARD – NETWORK SETTINGS

1. The final steps during the initial log-on and setup are to configure the Network Settings and change your computer network settings back to original status. **NOTE: You may need the assistance of the IT Administrator.**
2. Click "Edit."
3. Select the "IP Type." If you selected "DHCP," click "Save and Reboot."
4. If you selected "Static," enter the remaining Network IP setting information and select "Save and Reboot." **Note: You must enter the default password, "admin," and select "OK."**

The screenshot displays the 'Network' configuration wizard. On the left, a sidebar lists various settings with checkboxes: Language, License, Card Format, Holiday Group, Schedule, Door, Access Level, Card Holder, Card, Network (checked), and Start Save. The main window shows the 'Network Setting > IP Address' configuration page. The 'Basic' section includes the following fields:

- IP Type *: DHCP Static
- IP Address *:
- Subnet Mask *:
- Gateway *:
- DNS Server 1: (Optional)
- DNS Server 2: (Optional)
- HTTP Port: (Default 80)

At the bottom of the configuration window, there are three buttons: 'Save & Reboot' (highlighted with a red box), 'Reset', and 'Cancel'. Navigation arrows for 'Prev' and 'Next' are also visible.

1. The final steps during the initial log-on and setup are to configure the Network Settings and change your computer network settings back to original status. **NOTE: You may need the assistance of the IT Administrator.**
2. Click "Edit."
3. Select the "IP Type." If you selected "DHCP," click "Save and Reboot."
4. If you selected "Static," enter the remaining Network IP setting information and select "Save and Reboot." **Note: You must enter the default password, "admin," and select "OK."**
5. Log out of the eMerge system.

The screenshot displays the eMerge Setup Wizard interface. On the left, a sidebar titled 'Wizard' lists various configuration categories with checkboxes: Language, License, Card Format, Holiday Group, Schedule, Door, Access Level, Card Holder, Card, Network (checked), and Start Save. The main area shows the 'Network' configuration window, which is currently set to 'IP Address' configuration. The 'Basic' section includes fields for IP Type (set to DHCP), IP Address, Subnet Mask, Gateway, DNS Server 1, DNS Server 2, and HTTP Port. An 'Edit' button is visible below the fields. At the bottom of the configuration window are 'Prev' and 'Next' navigation buttons. In the top right corner of the wizard, a 'Logout' button is highlighted with a red box, and a red arrow points from step 5 of the instructions to it.

SETUP WIZARD – NETWORK SETTINGS

1. Log back into the eMerge System using the default user ID and password admin/admin.
2. You are now at the eMerge Wizard and ready to start using the system.
